Climatika

Nuestra pérgola bioclimática ofrece una protección total contra las inclemencias del tiempo con la posibilidad de orientar las lamas desde la posición cerrada de 0º hasta la apertura de 130º. Sus lamas motorizadas y orientables permiten que el aire circule y se regule así la temperatura. ¡Disfruta de tu propio clima!

*Our bioclimatic pergola offers complete protection against adverse weather conditions, with the ability to tilt the slats from a fully closed position at 0º up to an opening of 130º. Its motorised, adjustable slats allow air to circulate and help regulate the temperature. Enjoy your own personalised climate!*

**Aluminio**
